

Concrete Etch

*Manufacturers of High
Performance Floor
Coatings and
Re-Surfacing Screeds*

CLEANERS

- ▲ **Instant Removal of Concrete Laitance**
- ▲ **Inexpensive New Concrete Preparation**
- ▲ **Leaves a perfect “etched” surface**
- ▲ **Simple to use**

EPOXY PRODUCTS CONCRETE ETCH is a powerful acid based cleanser for the rapid removal of concrete laitance formed by power floating new concrete. Ideal preparation for new concrete floors prior to sealing, painting and resurfacing.

EPOXY PRODUCTS CONCRETE ETCH. Fast, active chemical reaction working immediately upon impact and transforming a polished power float finish into a surface with a slightly etched texture.

EPOXY PRODUCTS CONCRETE ETCH has been developed to provide an immediate, effective and inexpensive cleanser for concrete areas prior to receiving any resin based flooring.

Available in 5 litre and 25 litre plastic bottles.

DESCRIPTION

EPOXY PRODUCTS CONCRETE ETCH is an acid based cleanser designed for the rapid removal of concrete laitance from power float finishes found to new concrete floors.

USES: The rapid removal of concrete laitance from new concrete floors prior to receiving floor sealers, coatings, floor paints and any resin based flooring. Working immediately upon impact this cleanser will instantly remove the unwanted laitance leaving a slightly etched texture.

APPLICATION: Wear protective clothing, i.e. protective glasses, rubber gloves and overalls, to avoid skin and eye contact. Always read the Health and Safety Data Sheet prior to handling this product.

Pour sparingly from a plastic watering can and disturb and spread immediately with a soft broom. Avoid the temptation to spread the reacted solution across further areas of untreated concrete but continue to spread fresh cleanser onto the floor. Do not allow the Acid Etch to dry into the concrete.

RINSING Best results are achieved using Washer Scrubber Dryer and clean cold water.. Alternatively, rinse with cold water spread with a soft broom and remove water with a Wet Vacuum Pick Up Machine or squeegee. Repeat rinsing method until all traces of this acidic cleanser are neutralised.

DRYING Allow the treated area to dry thoroughly for one or two days.

HEALTH AND SAFETY: Always read the Health & Safety Data Sheet prior to handling this product. Avoid skin and eye contact. If eye contact is made then rinse with clean water and seek immediate medical advise.

PRODUCT DATA

COVERAGE

5 Litres should treat approximately 25 square metres.

SHELF LIFE

24 months in sealed containers

PACK SIZES

5 Litre or 25 Litre plastic bottles

LIMITATIONS

Use in well ventilated areas as this product does contain some active odorous ingredients that may cause irritation to some people. Do not allow to enter into swimming pools or use within chlorine treatment plant rooms. Read Health and Safety Data Sheet prior to handling this corrosive product.
